

# EXCESSIVE

## Heat In Homes

# PSA

**Is your house excessively hot? Did you know that you could live in a heat island? Watch our video to find out more about them**

# **Intro-**

**In this PSA we will be talking about excessive heating homes. The people that are affected by this environmental issue are the people who live in areas with a lack of tree coverage and hot surfaces. The problem with excessive heating in homes is the moisture within the home is removed, and therefore removes an essential element that we use to breathe.**
